

## **F. Erika**

My son, David, on 29<sup>th</sup> May in 1998 unexpectedly became paralyzed from his neck to downwards. The diagnosis is viral inflammation of the spinal marrow and it is only guessing because the completed examinations showed negative results. After one and a half year of the tragedy I met Kavalkó János who offered David to try the VSZT apparatus out which was developed by him. My son has a constant pain in his back because of injury of his spine-marrow. This pain is sometimes stronger or weaker. In case of a strong pain I immediately point the apparatus at his back and after a few minutes the pain lessens. We use it if urinating problems come out. In this case after about half an hour the urine begins, moreover, it completely cleans through the urinary bladder as the result of pointing the apparatus at the abdomen. In such a case of headache or any kind of pain I direct the point of the apparatus toward the suffering part of the body and its beneficial results are noticeable in short time. We almost keep the apparatus working constantly; at the hospital where my son is being rehabilitated and at weekends when he is at home. Our experience is that we, who are healthy and step into the room where the VSZT apparatus is working some kind of feeling arises like warmth, the shivers and prickling. After this, our body nearly feels refreshed. My elderly parents show a preference for using the VSZT apparatus. My father is cardiac and there are days when he feels himself very bad. In such a case he points the apparatus at the periphery of the heart. The initial feelings (they are unpleasant) are followed by pressing pain. After a while this pain lessens and stops. My mum also uses the VSZT apparatus with pleasure. She noticed that the torturing pain which appeared on the scarred surface of the skin- it was caused by shingles- is considerably lessens or stops. I have to tell the truth, the VSZT apparatus is very popular in our circle of acquaintances, and in the hospital among the nurses. Because of its popularity we have to make an arrangement that who wants to use it, when and how long. János, without his knowledge helps lots of people in lessening their pain and getting over it. On behalf of these people and my son I would like to express and interpret our gratitude and thanks for this 'Man' who does his job in an unselfish way and conscientiously. He does it for unknown people and for ill fellow-men. I wish you success, strength, persistence and good health.

Yours sincerely, David's mother
